

THINNER VD-500

Ready-to-use thinner

DESCRIPTION

Stannol VD-500 is based on isopropyl alcohol and is a ready-to-use thinner for electronic fluxes.

APPLICATION

Stannol VD 500 is particularly suitable to adjust losses of evaporation. This is especially necessary where foam fluxes are used to restore the correct flux concentration.

Furthermore Stannol VD-500 is suitable as a cleaning solvent for residues of organic rosins and acids.

PHYSICAL PROPERTIES AND DATA

GENERAL PROPERTIES	THINNER VD-500
Appearance:	colourless liquid
Odour:	alcoholic
Flash point:	13°C
Boiling point:	82°C
Ignition temperature:	425°C
Density (20°C):	0.785 g/cm ³

SHELF LIFE

2 years after date of delivery (provided proper storage in originally sealed container).

HEALTH AND SAFETY

Before using please read the material safety data sheet carefully and observe the safety precautions described.

NOTICE

The above values are typical and represent no form of specification. The Data Sheet serves for information purposes. Any verbal or written advise is not binding for the company, whether such information originates from the company offices or from a sales representative. This is also in respect of any protection rights of third parties, and does not release the customer from the responsibility of verifying the products of the company for suitability of use for the intended process or purpose. Should any liability on the part of the company arise, the company will only indemnify for loss or damage to the same extent as for defects in quality.
